## Profile

**Full Stack JavaScript/TypeScript Developer** with over **6 years** of comprehensive experience in the complete Software Development Life Cycle (SDLC), specializing in the design and development of scalable, user-focused web and mobile applications. Skilled in building modern applications using React, Next.js, Node.js, and NestJS, with strong proficiency in both SQL and NoSQL databases. Proven ability to translate complex business requirements into robust, maintainable solutions, with hands-on experience across all development phases—requirement analysis, architecture design, implementation, testing, and deployment.

Deeply involved in AI-powered application development, including the integration of GenAI and Retrieval-Augmented Generation (RAG) pipelines to enhance product intelligence and automation. Strong project management skills with accurate time estimation, efficient delivery, and a keen focus on performance, scalability, and end-user experience.

## Work History

### ReadyOn.ai – Remote

Oct 2024 – Present

ReadyOn.ai is an **AI-driven** platform focused on delivering intelligent automation and data-driven solutions. The company leverages cutting-edge technologies to build scalable web and mobile applications powered by modern AI and cloud infrastructure.

#### Technologies:

React, Next.js, React Native, NestJS, AWS, GraphQL, REST, RTK Query, Apollo Client, SQL, NoSQL, Jest, Component-based Testing, GenAI, RAG-based Pipelines, Docker, Infrastructure-as-Code.

#### Responsibilities:

- Implemented **end-to-end UI/UX across web and mobile platforms** using React, Next.js, and React Native.
- Developed and maintained **robust backend services** using NestJS and AWS cloud infrastructure.
- Integrated **RESTful and GraphQL APIs** using RTK Query and Apollo Client.
- Wrote comprehensive unit and **component-based test cases and storybook interaction test cases** to ensure code quality and reliability.
- Designed and implemented **RAG-based GenAI pipelines** for intelligent data retrieval and generation.
- **Managed and deployed remote infrastructure**, ensuring high availability and scalability.
- **Implemented components and features according to detailed PRDs**, conducted **bug bashes with product teams**, and took ownership until features completion.

## Postman - Remote (via Turing)

Aug 2023 – Feb 2025

Postman is a popular API (Application Programming Interface) development and testing tool. It provides a user-friendly interface to create, test, and document APIs, making it easier for developers to work with HTTP requests and responses.

### Technologies:

React, AWS, Electron.js, i18n, CircleCI, Jest, E2E tests, Unit tests, Integration tests, Jira, Confluence.

### Responsibilities:

- Worked on Internationalization of the postman platform.
- Part of the internal UI/UX foundation.
- Handling team workspace setting.
- Implementing and integrating the core features and modules in the postman organization.

## MicroMerger - Islamabad, Pakistan

2021 - Oct 2024

MicroMerger provides software solutions to National and International clients like WHO, UNDP and many more. As an associate software developer my role consisted of getting the requirements directly from clients and dividing them into individual decoupled tasks, while also participating in the front end and backend development to create scalable, high quality web Apps using Angular 2+ and Nest.js backend.

### Technologies:

React.js, Redux, Nest.js, Node.js, Express.js, Kuzzle, TypeORM, PostgreSQL, MySQL, Click house, Next.js, GCP, AWS, Kafka, Elasticsearch, Redis, Typescript, JavaScript, MongoDB, Git, REST APIs, GraphQL, Socket IO, JIRA, Trello, Kanban, AWS (Code Pipeline, S3, Cloud Search, Route53, DocumentDB, Lambda, EC2), Ant design, Linux Server Management, Jenkins, Docker.

### Key Projects at MicroMerger:

- **Polio Device Tracking:** Real-time tracking of IoT devices via Kuzzle, React, MQTT, ElasticSearch.
- **Hi-Crush Portal:** Firebase-hosted dashboard for order and fleet tracking.
- **Multi-Tenant Tracking (CDA):** MQTT-based real-time water flow monitoring system using Jenkins and Elasticsearch.
- **Bianat Stock Exchange (KSA):** Kafka + Flink-based stock trading system with dynamic subscriptions and real-time market feeds.
- **HRMIS (SELD):** Edoc module and HR APIs for the education sector using NestJS, Postgres, Keycloak, and MinIO.

## Upwork - Freelance

2021 - Ongoing

Collaborated with international clients on custom full-stack projects ranging from **dashboard applications** and **eCommerce platforms** to **AI-integrated web tools**. Utilized modern technologies such as **Next.js**, **NestJS**, **PostgreSQL**, and **AWS** to deliver tailored solutions. Known for translating complex business requirements into high-performance, production-ready applications with pixel-perfect UI and reliable backend logic.

### Technologies:

HTML5, CSS3, AJAX, jQuery, Shopify, Custom Cart Pages, Cart drawer, Custom Sections, JavaScript, React.js, Node.js, Express.js, Nest.js, MongoDB, MySQL, PostgreSQL, Docker, Next.js.

## Fiverr - Freelance

2019 - Ongoing

Delivered over **1,000+ software solutions** with a 5-star client rating, specializing in **web and eCommerce development**. Built dynamic **Shopify stores**, **custom themes**, and full-stack applications using **React.js**, **Node.js**, and **NestJS**. Developed scalable SPAs and integrated third-party APIs, payment gateways, and real-time features. Recognized for rapid delivery, clean code, and outstanding client satisfaction.

### Technologies:

HTML5, CSS3, AJAX, jQuery, Shopify, Custom Cart Pages, Cart drawer, Custom Sections, JavaScript, React.js, Node.js, Express.js, Nest.js, MongoDB, MySQL, PostgreSQL, Docker, Next.js.

## Education

### BS Software Engineering, International Islamic University

Islamabad, Pakistan 2017– 2021

### HSSC FSC. Pre-Engineering, Punjab group of colleges

Gujar Khan, Pakistan 2015 – 2017

### SSC Science Group, Fauji foundation model school

Sanghori, Pakistan 2013-2015

## Languages

Urdu : Native

English : Conversational
